this book instead.

SCIENCE TIME : EARTH

Our planet Earth is made up of four major layers. The thin, outermost layer where we live is called the **CRUST**. Beneath the crust is a rocky shell called the **MANTLE**. The next layer down is the **OUTER CORE**, which is liquid. Below the outer core is the **INNER CORE**. The inner core is solid. Label each layer of the Earth below using what you've learned.

SCIENCE TIME: THE SUN

The Sun is the star at the center of our Solar System which provides us with light. The Sun's outer layer is called the **CONVECTIVE ZONE**. The next layer is the **RADIATIVE ZONE**. The innermost layer of the Sun is called the **CORE**. Label each layer of the Sun below using what you've learned.

Zone

Zone

SCIENCE TIME : COMET

Comets are members of the solar system that look like snowballs zipping around the sun. Comets are composed of three main parts. The rocky center of a comet is called the **NUCLEUS**. The gas and dust surrounding the nucleus is the **COMA**. Following behind the coma is the **TAIL**, which is the easiest part of a comet to see in the night sky. Label each part of a comet below using what you've learned.
